- 110/240v - 50/60Hz**
- 610mm (w) x 730mm (h)**
- 150Kg**

Ergonomics

The OPTOMIC chairs' design is based on a search for the comfort of the patient and ergonomics during examination. This is the reason the geometry of its structure adapts to achieve the optimum distance between patient and doctor in every step of examination and treatment.

Sturdiness and Stability

The base of the OP-S7 chair, although small, gives it great stability and sturdiness, making it appropriate even for large patients.

Strong Folding Armrests

They are composed of a stainless steel interior, padded with flexible and washable polyurethane. They fold down completely to provide more comfort and better access to patients with reduced mobility.

Backrest and Legrest Movement

They are synchronized, so any position from 90° to -10° (Trendelenburg) can be achieved using the pedal or keypads.

A Precise System

Controlled through a joystick pedal or one of the two keypads which permit easy handling of the chair. They operate both the up/down movement and the inclination of the backrest. The keypads have four memories and the pedal has two more for the user to customize.

Rotation

The OP-S7 chair allows for a rotation of 380° (190° to the left and 190° to the right).
